### SUMMARY

GoHighLevel and automation specialist, about two years in the platform. I run CRM migrations end to end, build the Zapier and API layer around them, and check the result against the live account before calling it done. Open to project-based, part-time, or full-time work on AU, UK or SG hours.

### EXPERIENCE

GoHighLevel & Automation Specialist | GoScale (Remote)

May 2026 to Present

Dedicated to a US home inspection coaching company. I own their migration from Zoho One to GoHighLevel, which ran against a hard platform renewal date. Now on retainer.

- Migrated 4,256 contacts with batch tracking and read-back checks after every bulk write.
- Built and published 93 workflows, including five onboarding sequences, a membership application system and the lead to customer conversion logic.
- Built and maintain the Zapier integrations: Kajabi to GoHighLevel across five membership tiers, Meta Lead Ads and Stripe.
- Recovered 27,627 customer notes that a prior import had left behind.
- Found and fixed a workflow that was erasing payment and membership-date fields on every signup.
- Use the GoHighLevel API and Python scripts for bulk updates the workflow builder can't handle.
- Wrote the reference docs and trained the client's operations team.

Operations & Systems Architect (Executive Assistant) | The Creative Life by Matt Essam (Remote, UK)

Oct 2024 to May 2025

- Built the automated workflows behind multi-platform content releases in GoHighLevel and Zapier.
- Built lead magnet flows with ScoreApp and supported prospect conversion through the funnel.
- Executive support, including calendar management and ClickUp organisation.

SEO Sales Assistant | LinkGraph (Remote, seasonal contract)

Apr 2024 to May 2024

- Researched prospects, drafted proposals and maintained the sales pipeline in GoHighLevel.

IT Support Specialist | AMACC Calamba

Oct 2023 to Feb 2024

- In-house tech support for staff and facilities: Windows AD, RDP, Freshdesk, Moodle and WordPress.

Personal Trainer | Freelance

Jan 2018 to Oct 2023

- Ran my own client base for six years: assessed needs, built programs, tracked progress.

### EDUCATION

BS Cybersecurity | AMACC Calamba

2024
